

Accessibility Statement

Our commitment and approach to maintaining an accessible website

Effective Date:

The Community Choice Financial® Family of Brands, its subsidiaries, affiliates, and operating entities (collectively, “the Company,” “we,” “us” or “our”) seek to understand and respect the unique needs and perspectives of all consumers in the communities in which we offer products and services. We value every visitor to our website(s) and are committed to providing access to our website(s) to all people, regardless of ability. To provide this access, this website was developed and is maintained using Web Content Accessibility Guidelines (“WCAG”) for accessibility.

The site has been created to be usable as it is, though by providing accessible web content we can also benefit visitors who do not have disabilities, but who may be experiencing situational obstacles. To further increase access to our website, visitors can customize computers to suit their individual needs - for example: screen readers, changes in color-scheme, or font size increases.

We welcome all suggestions on improving the accessibility of our website(s). If you experience any difficulties accessing information, have ideas or comments that would help us improve the accessibility and usability of our website, or would like additional information on this website, please contact us at Customer.Service@ccfi.com. To enable us to respond in a manner most helpful to you, please indicate the nature of the accessibility problem, the web address of the requested material, your preferred format in which you want to receive the material (electronic format (ASCII, etc.), standard print, large print, etc.), and your contact information.

To assist in meeting the accessibility principles of the WCAG, this Accessibility Statement and training is provided to content providers, website content and technical support personnel. Accessibility fixes through development releases to ensure they are remediated with the same level of priority as any other equivalent loss of function for individuals without disabilities.

The Company will continue to invest time and resources to make improvements to all websites we manage, own, and operate.
